CARD CLUB LOUNGE

CARD CLUB LOUNGE is a turnkey concept that promotes online gaming services in live environments like card clubs, Internet cafés, pubs, billiard halls, arcades etc ("clubs"). The clubs will generate a new revenue stream from promoting popular gaming brands, and at the same time offer a new service that will attract customers to their premises. Gaming operators will reach customers, which they normally would not be able to reach through traditional marketing methods, without any upfront costs. By connecting the online and offline world, Card Club Lounge is creating a win-win situation for its partners.

Put simply, Card Club Lounge can be described as an affiliate scheme that comes together with an online portal customized for the host club. Once a player signs up with one of the affiliated sites through their portal, the club will start earning money from the player's activities through a competitive revenue sharing scheme. Commission will be generated not only when the players are playing from the club's computers, but also when they are playing from home or other locations.

Connected Table can assist clubs with recommendations regarding computer hardware and, by having our software installed, the clubs will be able to charge customers for Internet access. They will also be able to restrict the use of the computers and administrate them remotely from a central point.

When legally permitted to do so, clubs can handle smaller money transfers through player-to-player transfers. They can also sell vouchers or codes that can be redeemed on the sites. By offering such services, the need for traditional promotions like bonuses and rakeback is smaller.

If you operate a club, or if you have good connections in your local market and would like to know more about promoting Card Club Lounge as an agent, you are welcome to contact us to learn more about the benefits of Card Club Lounge and how to get started.
